

Name: _____

Element of Color

Primary Colors

These are the only colors that can't be created by mixing other colors together, also known as pure colors. They're the building block of all hues of the color spectrum. In painting, these colors are red, yellow, and blue.

Secondary Colors

Secondary colors consist of equal parts of two primary colors. In painting, the secondary colors are orange, purple, and green.

Tertiary Colors

Each individual color between primaries and secondaries on the color wheel are known as tertiary colors.
